2018 & 19**
by BSE Tefla's

INVESTMENT PHILOSOPHY

Narnolia follows the 'growth in value' investment philosophy and has demonstrated a successful track record measured in terms of superior risk adjusted return over a long period. Quality always prevails. Along with quality, in a growing economy like India where on every production or consumption parameter upside potential is still humongous. Majority of existing market leaders remain minuscule in the global context. Indian markets over the last thirty years since the great economic reform has oscillated between phases of out-performance by quality companies and phases of out-performance by growing businesses. 'Growth in Value' combines the advantages of these two fundamental parameters and helps create superior performance.

As explained briefly hereunder, this philosophy supported by the principle of linearity, 360 degree 5-M research framework and the risk management framework, one of the most comprehensive techniques, has helped us to generate superior risk adjusted return on an absolute, relative and consistent basis- not just by chance but by design:

1 PRINCIPLE OF GROWTH IN VALUE

We practice 'Growth in Value' investment framework. Here the word 'value' comes from 'being valuable' or 'Quality'. A company that is exhibiting or is expected to exhibit 'growth in value' becomes our investment candidate. This usually happens when due to business situation or management strategy or the inherent moat of the business, a company starts having higher and/or rising RoE, RoCE and the Free Cash flows. This is also accompanied by the company exhibiting higher return ratio than it's peers as well as broader stock universe.

2 PRINCIPLE OF LINEARITY

Company with good capital allocation and favorable business regime show rising margins and asset turnover yielding into higher return ratios. These businesses usually undergo valuation re-rating resulting into long term superior wealth creation in the stock market.

INVESTMENT PROCESS

WITH WELL DEFINED 5 STAGES & 112 SUB PROCESSES

As a result of our wide coverage of 2600 stocks & 112 sub-processes and proprietary data base of businessmen, evolved over the years, we are able to generate superior risk adjusted returns. We use quant for elimination only and not for selection.

Quant Needs Human Insight to Work

Rapidly growing Investment Advisory Portfolio investments has brought many new entrants, using quant based AI models but will eventually turnout to be an inefficient way for wealth creation

- "If somebody discovers what you've discovered, not only is it worthless, but it becomes over-discounted, and it will produce losses. A machine-learning strategy that does not employ human logic is bound to blow up eventually."
- "So the really big money tends to be made by investors who are right on qualitative decisions but, at least in my opinion, the more sure money tends to be made on the obvious quantitative decisions."
- **Allocation decision and rebalancing decisions** are more important than selection decisions in overall return which requires foundation of qualitative research.
- **Analysis data of business, not of business man**

NS INDUSTRY LEADERS ADVISORY PORTFOLIO

Objective

Long term capital appreciation by investing in companies that are the top-3 players of their respective industries.

Strategy

NS INDUSTRY LEADERS ADVISORY PORTFOLIO

Stock Selection Procedure Involving 3 Broad Processes

1

MQC

- M - Momentum In Return Ratios The RoE, RoCE or the Free Cash flows of company must be increasing
- Q - Quality Return ratios versus its peer as well as broader stock universe.
- C - Capital Allocation Management strategy on Allocation of funds

2

360 Degree Deductive Logic Framework

- Sustainable Valuation possible & factors impacting while identifying when market is under-pricing the company
- Outlook on the company Financials- why a company is considered trading below its intrinsic value
- Building a detailed business & financial model to realize the sources of earning & quality delta for the company.
- Management strategy in terms of its finances particularly in terms of source and deployment of capital, marketing strategy in terms of its products, segments, pricing etc.
- State of addressable market & identifying the changing dynamics of that addressable market.

3

Earnings & Quality: Both should be evolving in linear manner

There are three moving parts in terms of fundamental- stock price relation. These are changes in earnings, quality and valuation. Every company in its evolution passes through various stage of its progress. We prefer buying where linearity or a consistent positive delta is expected in earnings profile and the quality profile of the company. A stock before selection for portfolio should be first identified into what stage it is into.

NS MID & SMALL CAP ADVISORY PORTFOLIO

Objective

Long-term capital growth by investing in smaller but growing companies of India

Strategy

Active investing in NS Mid & Small Cap investment universe by identifying companies with improving fundamentals. Tactical weight allocation under the sub-classes to achieve positive return along with managing the risk.

Process - Fundamental Bottom Up Research

Information mining, financial modeling, investment thesis, active & rigorous tracking for changes in earnings & quality outlook.

Benchmark - Nifty Mid & Small 400

No. of Stocks

20-30 Stocks

Recommended Min. Time Horizon

7 Years

Why NS Mid & Small Cap Advisory Portfolio?

Most of the multi bagger stock today were NS Mid & Small Cap few years back. Over the last 2 years, NS Mid & Small Cap stocks have seen sharp fall owing to credit squeeze, demand slowdown and over ownership during 2017. NS Mid & Small Cap theme portfolio is not meant as core portfolio for an investor but some tactical allocation by investors in NS Mid & Small Cap theme can be highly valuable.

NS Mid & Small Cap Companies perform well in up cycles. The continuous rate cuts by the RBI will create base for next bull market to start.

Large Cap Companies

- Large Cap Companies: The Top 100 companies by market capitalization fall into the category of Large Cap Companies.
- These companies are the most liquid in nature. They have their Beta closest to 1 and run in sync with the overall market.

Mid Cap Companies

- Mid Cap Companies: The ones who fall in 101st to 250th company by Market Capitalization.
- These stocks tend to be riskier than the large cap stocks & less risky than Small Cap stocks. They however offer more great potential than the large cap stocks

Small Cap Companies

- The 251st onward companies as per full market capitalization can be called as small cap stocks
- These stocks are the most volatile in nature. They become inconsistent during recessionary phases, however they outperform Large & mid cap companies in Bull periods.

Please Note: The securities quoted are for illustration only and are not recommendatory.

NS MID & SMALL CAP ADVISORY PORTFOLIO

Key Features of Ns Mid & Small Cap Advisory Portfolio

Investment in high risk but high gain

Mid & Small Cap stocks are usually high risk high gain opportunities

Cap Risk:

The Investment advisory portfolio carries cap risk as it is exposed primarily to the Mid & Small capitalization stocks.

Benchmarking:

The Investment advisory portfolio will be benchmarked against the Nifty Mid & Small Cap 400 Index.

The portfolio:

The portfolio will consist of 20-30 stocks to provide superior returns.

Growth in Value Framework

Companies that have improving/higher return ratio are favored.

Bottom Up Analysis:

A rigorous bottom up research of business financials & management strategies is carried out for all portfolio companies.

NS 5TX5T THEMATIC ADVISORY PORTFOLIO

Objective

This portfolio provides a unique theme-based investing opportunity in the Indian market. As India approaches towards becoming a 5 trillion economy by GDP, the total Market Cap of Indian companies will also set to increase by 11-12% CAGR. Some of the market cap gains will come from new listings but a large part of the gains will come from select themes. This strategy focuses on themes that should form part of India's next growth engine.

Strategy

The portfolio will consist of 15-20 stocks to provide superior returns. 2-6 stocks from each of the chosen 4-6 Selected Themes. Maximum Weight on any stock will be 10% while maintaining sector diversity

Process - Fundamental Bottom Up Research

Information Mining-> Financial Modeling-> Investment Thesis-> Active & Rigorous tracking for changes in Earnings & Quality outlook.
